

INFINITYFI

**THE NEXT GENERATION
OF DECENTRALIZED GAMING**

INFINITYFI

is a decentralized gaming platform that rewards users who play, create, and are a part of the community. The InfinityFi Platform allows users to create minigames, and rewards them based on the amount of plays their game receives. InfinityFi is a deflationary token. Each day, a net of 50% of the total burnt tokens due to trading will be generated as a part of the game platform, leaving an overall burn of tokens and deflation each day.
